

Is Your Business Protected?

**Ransomware?
Viruses?
Malware?
CryptoLocker?**

**Starting At
\$4.99/Month
Per Endpoint**

Cross Platform Protection

Exchange files and email attachments among Windows, Mac and Linux endpoints with confidence that malware targeting any of these platforms will be automatically detected and eliminated.

Advanced Threat Detection

Eliminates all types of threats including viruses, rootkits, ransomware and spyware. Provides real-time on-access scanning of the server-stored data. Prevents malware and unauthorized users from disabling the security of the system.

Real-time Protection & Monitoring

Datacomm NOC engineers have a real-time dashboard showing the status of all your devices with event notifications to ensure your business is secure 24x7x365.

Cyber Liability Requirement

While there are many security related requirements to qualify for Cyber Liability insurance, implementing end point security will be one less thing to be worried about.

ESET Endpoint Protection

Datacomm engineers will manage every aspect of your endpoint security protection so you never have to worry about license renewals, business loss, software updates along with ransomware and malware mitigation.

Protect your company computers, laptops, mobile devices and servers with security products all managed by Datacomm engineers. This solution includes preventing zero-day threats, and full disk encryption capability for enhanced data protection. ESET Endpoint Protection provides essential protection for the company network to keep your data secure.

Datacomm provides a one-click security deployment process and gives you visibility without the need to buy or maintain additional hardware and software while reducing the total cost of ownership.

With simple month-to-month licensing, you will never have to worry about your Endpoint Protection licenses expiring leaving you unprotected. Never again will you be over billed for your Endpoint Protection Licensing.
